Research Summary

Dry construction materials refer to building materials that do not require the use of water during installation or assembly, as opposed to traditional wet construction methods that involve wet mixtures like concrete or mortar. Dry construction materials include products like drywall (also known as gypsum board or plasterboard), metal studs, acoustic panels, suspended ceilings, raised flooring systems, and modular partition walls. These materials are pre-fabricated and can be easily assembled on-site, often using techniques like screwing, clipping, or interlocking. Dry construction methods are known for their speed, efficiency, and reduced mess compared to wet construction, making them popular in commercial, residential, and industrial projects where quick installation and minimal disruption are desired.

The major global manufacturers of Dry Construction Material include Knauf, Saint Gobain, BaoWu, ArcelorMittal, USG, CSR, Nippon, Etex, Arauco, Boral, AWI, Kronospan, BNBM, etc. The global players competition landscape in this report is divided into three tiers.
