Research Summary

Dry mortar is a premixed blend of cement, sand, and other additives used in construction for various applications, such as laying bricks, tiles, or stones, as well as for rendering and plastering walls. Unlike traditional mortar, which is prepared on-site by mixing dry ingredients with water, dry mortar comes pre-packaged in bags and only requires the addition of water to create a workable mixture. This ready-to-use nature of dry mortar offers several advantages, including consistent quality, reduced labor and waste, and faster construction times. Dry mortar is available in different formulations tailored to specific construction needs, such as masonry mortar, tile adhesive, and plastering mortar, making it a versatile solution in modern building practices.

The major global manufacturers of Dry Mortar include Sika, Saint-Gobain Weber, Henkel, Mapei, BASF, Cemex, Knauf, Ardex, Bostik, CBP, Hanil Cement, Caparol, Sto, Quick-mix, Baumit, HB Fuller, Forbo, CPI Mortars, Grupo Puma, Tarmac, etc. The global players competition landscape in this report is divided into three tiers.
