Research Summary

Dry pasta refers to a type of pasta made from durum wheat semolina that has been mixed with water, kneaded into dough, and then shaped into various forms such as spaghetti, penne, macaroni, and more. The dough is typically extruded through dies to create specific shapes, which are then dried to reduce moisture content and increase shelf life. Unlike fresh pasta, which contains higher water content and requires refrigeration, dry pasta is dehydrated, making it a convenient and non-perishable pantry staple. Dry pasta is widely used in cooking, requiring boiling in water to rehydrate and soften before consumption. It's a versatile ingredient in a range of dishes, from classic pasta recipes to international cuisines, offering an easy and economical option for meals at home.

The major global manufacturers of Dry Pastas include Airmeter, Barilla, Bear Coming, Guangdong Kangli Food, EWEN, Lasicilia, De Cecco, Molisana, THRIVISZH, Alce Nero, Pasta Zara, Gallo, etc. The global players competition landscape in this report is divided into three tiers.
