Research Summary

Electronic Article Surveillance (EAS) systems are anti-shoplifting and anti-theft security systems commonly used in retail stores and libraries. They typically consist of three main components: security tags or labels attached to merchandise, pedestals or gates at store entrances and exits equipped with sensors, and a control and alarm system. EAS systems work by generating a radio frequency or electromagnetic field that interacts with the tags or labels. When someone attempts to exit the store with an item that hasn't been properly deactivated or removed, the system triggers an alarm, deterring theft and alerting store personnel to the potential theft. EAS systems play a crucial role in loss prevention and asset protection, helping retailers reduce shoplifting and inventory shrinkage.

The major global manufacturers of EAS Systems include Checkpoint Systems, Sensormatic, Tyco Retail Solutions, Nedap, Gunnebo Gateway, WGSPI, Ketec, All Tag, Universal Surveillance Systems, r-pac International Corporation, Securitas Technology, Hangzhou Ontime I.T.Co.,Ltd, Hangzhou Century Co., Ltd, Nuotatelun (Hangzhou) Electronics Co., Ltd, Qingdao Wise Security Technology Co Ltd, etc. The global players
