Research Summary

Electric Vehicles (EVs) designed for construction, agriculture, and mining, often referred to as electric off-highway vehicles (e-OHVs), are specialized electric vehicles tailored for heavy-duty industrial applications. These EVs are equipped with powerful electric motors and substantial battery packs to provide the necessary torque and energy for heavy lifting, excavation, or transportation tasks in these sectors. By replacing traditional diesel-powered machines with electric alternatives, they aim to reduce emissions, noise, and operating costs while increasing efficiency. Electric off-highway vehicles contribute to a more sustainable and environmentally friendly approach to industrial operations in construction, agriculture, and mining, promoting a shift towards cleaner and quieter technologies in these traditionally high-pollution and resource-intensive industries.

The major global manufacturers of Electric Vehicles for Construction, Agriculture and
