Research Summary

Electrical panels, often known as distribution boards or breaker boxes, are crucial components in electrical systems. They serve as central control units for electricity distribution, managing the flow of electrical power throughout a building or facility. These panels house circuit breakers, fuses, and other protective devices that regulate and safeguard electrical circuits. By dividing the electrical supply into separate circuits, electrical panels enable the safe distribution of electricity to various outlets and appliances, while also providing a means to disconnect power in the event of overloads or faults. Electrical panels are essential for controlling and organizing electrical distribution, ensuring safety, and facilitating maintenance and troubleshooting within a building's electrical infrastructure.

The major global manufacturers of Electrical Panels include Schneider Electric, Eaton, ABB, Siemens, GE, Leviton, Legrand, Hager, Penbro Kelnick, Paneltronics, Alt?nsoy Enerji, etc. The global players competition landscape in this report is divided into three tiers.
