Research Summary

An electro-fusion coupler is a specialized connector used in the field of plastic pipe welding, particularly in applications like water and gas distribution systems. It utilizes an electric current to melt and fuse the ends of two thermoplastic pipes together, creating a strong and leak-resistant joint. This process involves placing the coupler between the pipe ends, which contain embedded heating elements and a metal coil, and then applying controlled electrical energy to melt the plastic material and form a permanent, homogeneous connection. Electro-fusion couplers are known for their reliability, speed, and ability to produce robust connections, making them an essential component in the construction and maintenance of plastic pipe networks.

The major global manufacturers of Electro-fusion Coupler include Aliaxis, GF, Wavin, Plasson, Radius, Polypipe, Geberit, Rehau, Agru, Egeplast, Nupi, Fusion, Hidroten, Cangzhou Mingzhu, etc. The global players competition landscape in this report is divided into three tiers.
