### Research Summary

Electronic faucets, also known as sensor faucets or touchless faucets, are innovative plumbing fixtures designed for hands-free and automated water dispensing. These faucets incorporate electronic sensors, typically infrared or capacitive sensors, to detect the presence of a user's hands or an object underneath the faucet. When a user's hands are detected, the sensor triggers a valve to open, allowing water to flow. As soon as the user moves their hands away, the valve closes, stopping the water flow. Electronic faucets offer several advantages, including improved hygiene by reducing the risk of cross-contamination, water conservation by controlling flow duration, and convenience as users do not need to physically touch the faucet handles, making them ideal for public restrooms, healthcare facilities, and other settings where cleanliness and water efficiency are paramount.

The major global manufacturers of Electronic Faucets include LIXIL Water Technology, Masco Corporation, Kohler, TOTO, Moen, Oras, Sloan Valve, PRESTO Group, Geberit, Roca, Pfister, Joomo, Beiduo Bathroom, Sunlot Shares, Advanced Modern
