Research Summary

Electrostatic disinfectant sprayers are innovative devices used for efficient and comprehensive surface disinfection, particularly in environments where hygiene and cleanliness are critical, such as healthcare facilities, schools, and public spaces. These sprayers utilize electrostatic technology to charge the disinfectant solution as it is sprayed, creating a fine mist of positively charged droplets. These charged particles are attracted to negatively charged surfaces, ensuring an even and thorough coverage of disinfectant on all sides and hard-to-reach areas of objects and surfaces. Electrostatic disinfectant sprayers are known for their speed and effectiveness in eradicating bacteria and viruses, making them a valuable tool for maintaining sanitized and safe environments, especially in the context of infection control and prevention.
