Research Summary

Emergency and exit lighting are essential safety features installed in buildings to provide illumination during power outages, emergencies, or evacuations. Emergency lighting typically consists of battery-powered light fixtures strategically placed throughout a building to ensure visibility and safe egress in the event of a power failure. These fixtures are designed to automatically activate when the main power supply fails, providing temporary lighting until normal power is restored. Exit lighting specifically indicates the location of emergency exits, stairwells, and evacuation routes using illuminated signs or fixtures with the word "EXIT" or directional arrows. In addition to battery-powered fixtures, emergency and exit lighting systems may include backup power sources such as generators or centralized battery systems for larger buildings or facilities. These systems are critical for ensuring the safety of building occupants and facilitating orderly evacuations during emergencies such as fires, earthquakes, or other disasters. Regulatory codes and standards mandate the installation, testing, and maintenance of emergency and exit lighting systems to ensure they function properly when needed.

The major global manufacturers of Emergency & Exit Lighting include Philips, Schneider, Minhua, Acuity Brands, Ventilux, Eaton Electric, ABB, Zhenhui Company, Legrand, Hubble Group, Mule, LINERGY, Emerson, Zhejiang Taiyi, Guangdong Okote, Shenzhen Yuanheng, etc. The global players competition landscape in this report is divided into three tiers.
