Research Summary

Equestrian helmets are specialized protective headgear designed for horseback riders to reduce the risk of head injuries and concussions in the event of a fall or accident while riding. These helmets are a crucial safety component for riders of all ages and skill levels, from beginners to experienced equestrians, and they adhere to specific safety standards and certifications. Equestrian helmets typically feature a hard outer shell made of materials like polycarbonate and a soft inner lining, often composed of expanded polystyrene (EPS) foam, designed to absorb and disperse impact forces.
