Ethiprole is a chemical compound and a systemic insecticide used in agriculture to protect a wide range of crops from various insect pests. It belongs to the class of chemicals known as pyrazole insecticides and is known for its effectiveness against chewing and sucking insects like aphids, thrips, and whiteflies. Ethiprole works by disrupting the nervous system of insects, ultimately leading to their paralysis and death. It is applied through foliar sprays, soil treatments, or seed treatments, depending on the target crop and pest.
