Research Summary

An EV pyro switch, also known as a pyrotechnic safety switch, is a critical safety component in electric vehicles (EVs) designed to rapidly disconnect the high-voltage battery in the event of a collision or severe accident. This switch uses a small explosive charge to sever the electrical connection between the battery and the vehicle's power system, effectively isolating the battery to prevent electrical hazards, such as short circuits, fires, or electric shocks. The pyro switch ensures that the high-voltage system is quickly and safely deactivated, protecting passengers, emergency responders, and the vehicle's components. By providing an immediate response in emergency situations, the EV pyro switch enhances the overall safety of electric vehicles.

The major global manufacturers of EV Pyro Switch include Autoliv, Daicel, Pacific Engineering Corporation (PEC), Littelfuse, Mersen, Eaton, Miba AG, MTA Group, Xi'an Sinofuse Electric, etc. The global players competition landscape in this report is divided into three tiers.
