Research Summary

Expanded Polystyrene (EPS) packaging refers to the use of expanded polystyrene foam, commonly known as styrofoam, as a material for protective packaging and cushioning applications. EPS packaging is known for its lightweight yet sturdy properties, making it an excellent choice for safeguarding fragile and sensitive items during shipping and handling. It is widely used in the packaging of electronics, appliances, glassware, and many other products. EPS packaging effectively absorbs shocks and impacts, protecting items from damage while providing thermal insulation. It is also valued for its cost-effectiveness, recyclability, and ease of customization to fit the specific shape and size of the products it encases. However, the environmental impact of EPS packaging has raised concerns due to its non-biodegradable nature, which has led to efforts to explore more sustainable alternatives in packaging solutions.

The major global manufacturers of Expanded Polystyrene (EPS) Packaging include Schaumaplast, Atlas Roofing Corporation, Styrene Packaging & Insulation Ltd, Plasti-
