Research Summary

Ferric citrate is a chemical compound that consists of iron combined with citric acid. It is commonly used as a medication, primarily for the treatment of high levels of phosphate in the blood (hyperphosphatemia) in individuals with chronic kidney disease who are undergoing dialysis. Ferric citrate works by binding to dietary phosphate in the digestive tract, preventing its absorption into the bloodstream, and subsequently lowering blood phosphate levels. It also provides a source of elemental iron, which can help address iron deficiency anemia in some patients. Ferric citrate is available in oral tablet or powder forms and is prescribed under various brand names for its therapeutic effects in managing phosphorus and iron levels in certain medical conditions.

The major global manufacturers of Ferric Citrate include Keryx, Panion & BF Biotech, Japan Tobacco, Nantong Feiyu, Innophos, Jost Chemical, Showa Kako, Ruipu Biological, Shreenath Chemical, etc. The global players competition landscape in this report is divided into three tiers.
