Research Summary

Fire barrier products are specialized materials and systems designed to impede or prevent the spread of fire and smoke within a building or structure. These products are strategically installed to create a barrier that hinders the progress of flames and heat, compartmentalizing different areas and providing valuable time for occupants to evacuate safely. Fire barrier products can include fire-resistant coatings, fireproof curtains, fire-resistant sealants, and other materials specifically engineered to withstand high temperatures and inhibit the transmission of fire. These products are crucial in enhancing the overall fire safety of a building, as they help contain fires, limit damage, and protect critical structures, allowing for a more controlled response to fire emergencies. Compliance with building codes often requires the use of fire barrier products to enhance the passive fire protection measures within a structure.

The major global manufacturers of Fire Barrier Products include 3M, CS Group, Kingspan Group, Rockwool, Inpro Corporation, Furukawa Techno Material, STI Firestop, Hilti Group, Saint-Gobain ISOVER, Tremco, Knauf Insulation, Fosroc, Shanghai ABM Rock Wool, Shanghai Fanfan New Building Materials, Nanjing
