### Research Summary

Fish collagen peptides are protein supplements derived from the collagen of fish, typically fish skin or scales. Collagen is the most abundant protein in the human body and is a key component of skin, bones, tendons, and connective tissues. Fish collagen peptides are hydrolyzed, meaning the collagen molecules are broken down into smaller, more easily absorbed peptides. These peptides are rich in amino acids, particularly glycine, proline, and hydroxyproline, which are essential for maintaining skin elasticity, joint health, and overall connective tissue integrity. Fish collagen peptides are popular in the beauty and wellness industry, often used as a dietary supplement to support healthy skin, hair, and nails. Due to their bioavailability and the absence of some allergenic components found in other collagen sources, fish collagen peptides are a suitable option for individuals seeking collagen supplementation for various health and cosmetic benefits.

The major global manufacturers of Fish Collagen Peptides include Lanli Bio-Technology, Hainan Pure Peptide Technology CO.,LTD., Hainan Huayan Collagen
