### Research Summary

A flap disc is an abrasive tool used for grinding, blending, and finishing metal and other materials. It consists of overlapping abrasive flaps arranged radially around a central hub. These flaps are made of abrasive cloth, usually coated with aluminum oxide, zirconia alumina, or ceramic materials. The design allows for a smooth and controlled material removal process while providing flexibility and conformity to the workpiece's contours. Flap discs are commonly mounted on angle grinders and come in various grit sizes, allowing users to achieve different finishes ranging from coarse grinding to fine polishing. They are widely used in metal fabrication, welding, and construction applications, offering versatility and efficiency in surface preparation and finishing tasks.
