Research Summary

Flexible firestop sealant is a specialized construction material designed to prevent the spread of fire and smoke through openings in fire-rated walls, floors, and ceilings. This sealant is formulated to remain pliable and flexible even after curing, allowing it to accommodate movement and expansion in building materials without compromising its fire-stopping capabilities. It is commonly used to seal gaps, joints, and penetrations around pipes, cables, ducts, or other openings in fire-rated assemblies. Flexible firestop sealants typically have a high resistance to heat and flame, and they create a fire-resistant barrier that helps maintain the integrity of the fire-rated construction, limiting the passage of fire and smoke in the event of a fire. These sealants play a critical role in passive fire protection, contributing to the overall safety and containment measures within a building.

The major global manufacturers of Flexible Firestop Sealant include 3M, Hilti, Rockwool, H. B. Fuller, Bostik (Arkema), Tremco, Everbuild (Sika AG), Specified Technologies, Fosroc (JMH), Pecora, Trafalgar Fire, Metacaulk (Rectorseal), Promat,
