Research Summary

A flexible spacer is a component commonly used in the construction of insulated glass units (IGUs) to separate and maintain the distance between the glass panes. Unlike traditional rigid spacers, flexible spacers are typically made from materials such as silicone or thermoplastic elastomers, providing a degree of flexibility that accommodates the natural expansion and contraction of glass due to temperature variations. This flexibility helps reduce stress on the sealant and improves the overall thermal performance of the IGU by minimizing the potential for thermal stress-induced breakage. Additionally, flexible spacers contribute to enhanced energy efficiency by reducing heat transfer through the edges of the glass, resulting in improved insulation properties for windows and other glazed surfaces.

The major global manufacturers of Flexible Spacer include Swisspacer, Ensinger, Technoform Glass Insulation, Glasslam, Alu-Pro(Rolltech), Edgetech (Quanex), Viracon, AGC Glass, Thermoseal, K?MMERLING, Nantong Heding Building Materials Technology, Lvya Building Decoratio, Nanjing Nanyou Energy Saving Technology,

Nanjing Nanyou New Materials, Liaoning Shuangqiang Plastic, etc. The global players competition landscape in this report is divided into three tiers.
