Research Summary

Float glass is a type of high-quality flat glass produced through the float glass manufacturing process. In this method, molten glass is poured onto a bed of molten metal, typically tin, creating a smooth and continuous ribbon. As the glass spreads across the molten metal surface, it undergoes controlled cooling, resulting in a uniform thickness and pristine, distortion-free surface. Float glass is known for its excellent optical clarity, transparency, and consistent thickness, making it a preferred choice for architectural applications such as windows, doors, and facades in residential and commercial buildings. Its versatility allows for further processing into various forms, including tempered glass and laminated glass, to enhance safety and meet specific performance requirements in construction and automotive industries.

The major global manufacturers of Float Glass include NSG Group, Xinyi Glass, Kibing-Glass, AGC, Guardian, Saint Gobain, Cardinal, Vitro (PPG), Sisecam, Central Glass, China Southern Glass, China Glass Holdings, Taiwan Glass, Luoyang Glass, Jinjing Group, SYP, Fuyao Group, Qinquangdao Yaohua, Sanxia New Material, Lihu Group, etc. The global players competition landscape in this report is divided into three tiers.
