Research Summary

Food grade calcium propionate is a salt of propionic acid, a naturally occurring organic acid, and calcium. It is used as a preservative in the food industry to prevent the growth of mold and other microorganisms, extending the shelf life of various baked goods and food products. Calcium propionate is effective in inhibiting the development of mold and fungi, particularly in bread and bakery items, where it helps maintain freshness and prevent spoilage. It works by disrupting the cellular processes of these microorganisms, preventing their proliferation. Being food-grade means that calcium propionate complies with safety and quality standards established for use in food products, ensuring that it is safe for consumption and does not pose health risks when added to foods within specified limits.

The major global manufacturers of Food Grade Calcium Propionate include Jiangsu Mupro IFT, Eton Food, Shandong Tongtai Weirun, Niacet, Macco Organiques, Fine Organics, Impextraco, Lianyungang Nuoxin, Runda Food Technology (Shandong), Shuren Kechuang, Tengzhou Aolong Chemical, A.M Food Chemicals, Perstorp AB,
