Research Summary

Food grade polysorbate refers to a group of nonionic surfactants that are approved for use in the food industry as emulsifiers, stabilizers, and solubilizing agents. Polysorbates are derived from sorbitol and its derivatives and are designated by numbers such as Polysorbate 20, Polysorbate 40, Polysorbate 60, and Polysorbate 80, each tailored for specific applications based on their properties. These compounds are utilized to enhance the texture, appearance, and shelf life of various food products by facilitating the mixing of ingredients that would otherwise separate (emulsification), stabilizing emulsions to prevent ingredient separation, and improving the solubility of hydrophobic substances in water-based systems. Food grade polysorbates are widely used in processed foods, beverages, bakery items, confectionery, and dairy products to ensure consistent quality and sensory appeal while meeting regulatory safety standards for food additives.

The major global manufacturers of Food Grade Polysorbate include Croda, KAO, SEPPIC, Oleon, Guangdong Runhua Chemistry, Jiangyin Huayuan, Mohini Organics,
