### Research Summary

Food-grade recycled plastics are recycled materials that meet stringent safety and quality standards for use in food contact applications. These plastics are derived from post-consumer or post-industrial waste, such as beverage bottles or packaging, and undergo rigorous cleaning, sorting, and reprocessing to ensure they are free from contaminants. Commonly recycled polymers include PET (polyethylene terephthalate) and HDPE (high-density polyethylene), which are widely used in containers, bottles, and packaging. The use of food-grade recycled plastics helps reduce reliance on virgin plastic, supports sustainability, and minimizes environmental impact while maintaining compliance with health and safety regulations. These materials are increasingly important in promoting a circular economy within the food and beverage industry.

The major global manufacturers of Food Grade Recycled Plastics include Clear Path Recycling, Clean Tech Incorporated, Mohawk Industries Incorporated, CarbonLite Industries, Envision Plastics Industries, Advanced Environmental Recycling Technologies Incorporated, Evergreen Plastics, PolyQuest, Phoenix Technologies,
