### Research Summary

A food tray sealer is a packaging machine designed to seal and protect food items within trays or containers. This equipment is commonly used in the food industry for packaging applications that require a secure and airtight seal to maintain the freshness and hygiene of the contents. Food tray sealers typically work by applying heat to a pre-formed tray or container, which activates a heat-sealable film or lid, creating a tight seal. This process helps extend the shelf life of perishable goods, prevents contamination, and preserves the overall quality of the food.
