Research Summary

Galacto-oligosaccharide (GOS) is a type of prebiotic compound, a non-digestible carbohydrate that serves as a substrate for beneficial bacteria in the gastrointestinal tract. It consists of short chains of galactose molecules linked together. GOS is naturally found in certain foods, such as human breast milk, and is also produced commercially for use as an ingredient in various food products, including infant formula and functional foods. As a prebiotic, GOS selectively stimulates the growth and activity of beneficial bacteria, such as bifidobacteria, in the colon. This promotes a healthy balance of gut microbiota, contributing to improved digestive health and potential immune system benefits. GOS has gained attention for its functional properties in promoting gut health and is often included in dietary supplements and food products aimed at supporting overall well-being through the modulation of the gut microbiome.

The major global manufacturers of Galacto-oligosaccharide (GOS) include ABO Switzerland, Clasado, Ingredion, New Francisco Biotechnology Corporation, Nissin Sugar Manufacturing, Qingdao FTZ United international, Royal FrieslandCampina,
