### Research Summary

A garbage truck, also known as a waste collection vehicle or trash truck, is a specialized vehicle designed for the efficient collection and transport of municipal solid waste. These trucks come in various types, including front-loaders, rear-loaders, and side-loaders, each equipped with mechanisms for lifting, compacting, and dumping waste containers. Front-loaders use hydraulic arms to pick up bins from the front, while rear-loaders and side-loaders have mechanisms at the back or side, respectively. Garbage trucks play a critical role in municipal waste management systems, collecting trash from homes and businesses and transporting it to disposal sites, recycling centers, or waste-to-energy facilities. The compacting feature helps maximize the amount of waste that can be transported in a single trip. These vehicles are essential for maintaining public sanitation, ensuring timely waste removal, and contributing to environmental sustainability through proper waste disposal and recycling practices.

The major global manufacturers of Garbage Truck include Superior Pak, Bucher Municipal, Volvo, Papas, FAUN Zoeller, Russ Engineering Pty Ltd, Dennis Eagle, Heil
