### Research Summary

Gaseous helium is the elemental form of helium in its gas state. Helium is a noble gas with the chemical symbol He and atomic number 2. It is colorless, odorless, and tasteless, and it exists in a gaseous state at standard temperature and pressure. Helium is known for its low boiling point, making it one of the few elements that remains in a gaseous state even at extremely low temperatures. It is lighter than air, non-reactive, and has a variety of industrial and scientific applications. Gaseous helium is commonly used for applications such as cooling in cryogenic systems, lifting in balloons, and as a carrier gas in analytical instruments. Its unique properties, including its ability to remain inert and not solidify even at extremely low temperatures, contribute to its widespread use in various scientific, medical, and industrial processes.

The major global manufacturers of Gaseous Helium include Air Liquide SA, Air Products & Chemicals, Inc., Airgas, Buzwair, Exxon Mobil Corporation, Gazprom, Gulf Cryo, Iwatani Corporation, Messer Group, Linde AG, PGNiG (PL), Praxair Inc., Somatrach, Weil Group Resources, etc. The global players competition landscape in this report is
