### Research Summary

Golf shoes are specialized footwear designed for golfers to provide stability, traction, and comfort during their swings and while navigating the golf course. These shoes typically feature cleats or spikes on the sole to enhance grip on the grass, preventing slipping or sliding during the golf swing. The design of golf shoes often includes materials that offer support, breathability, and waterproofing to cater to various weather conditions. Golfers wear different types of golf shoes based on their preferences and the course conditions, with some opting for spiked shoes for maximum traction, while others prefer spikeless models for versatility and comfort. Golf shoes are an essential part of a golfer's equipment, contributing to proper weight distribution, balance, and overall performance on the course.

The major global manufacturers of Golf Shoes include FootJoy, Nike, Adidas, ECCO, Callaway, Under Armour, New Balance, Skechers, Puma, Slazenger, Decathlon, Mizuno, TRUE Linkswear, Sandbaggers, etc. The global players competition landscape in this report is divided into three tiers. The first tier comprises global leading enterprises that command a substantial market share, hold a dominant industry position, possess

strong competitiveness and influence, and generate significant revenue. The second tier includes companies with a notable market presence and reputation; these firms actively follow industry leaders in product, service, or technological innovation and maintain a moderate revenue scale. The third tier consists of smaller companies with limited market share and lower brand recognition, primarily focused on local markets and generating comparatively lower revenue.
