### Research Summary

GRP (Glass Reinforced Plastic) and GRE (Glass Reinforced Epoxy) pipes are types of composite materials used in the construction of pipes for various industrial applications. Both GRP and GRE pipes are reinforced with glass fibers, offering high strength, corrosion resistance, and durability. GRP pipes typically use polyester or vinyl ester resins, while GRE pipes use epoxy resins. The combination of glass fibers and the resin matrix results in pipes with excellent mechanical properties and resistance to chemical corrosion, making them suitable for applications in industries such as oil and gas, chemical processing, water treatment, and infrastructure. These pipes are lightweight, easy to install, and have a long service life, making them a preferred choice for conveying fluids in corrosive or harsh environments. The choice between GRP and GRE depends on specific project requirements, including the type of chemicals being transported and the operating conditions.

The major global manufacturers of GRP & GRE Pipe include Future Pipe Industries (FPI), National Oilwell Varco (NOV), AMIBLU, Farassan, Fibrex, Lianyungang Zhongfu,

Hengrun Group, Abu Dhabi Pipe Factory, Shawcor (ZCL Composites Inc), Chemical Process Piping (CPP), Enduro Composites, Graphite India Limited, etc. The global players competition landscape in this report is divided into three tiers.
