Hand sanitizer gel is a portable and convenient solution containing a high concentration of alcohol, usually ethyl or isopropyl alcohol, which effectively kills germs and bacteria on the hands without the need for water. It is commonly used in situations where traditional handwashing is impractical. Hand soap, on the other hand, is designed for use with water. It comes in liquid form and is often enriched with moisturizers, antibacterial agents, and pleasant scents. Hand soap works by creating lather, facilitating the removal of dirt, bacteria, and viruses during handwashing. Regular and proper use of these products, whether on the go or at home, contributes to effective hand hygiene and reduces the risk of illness.
