### Research Summary

Heat guns are handheld tools designed to produce a stream of hot air for various applications such as stripping paint, thawing frozen pipes, shrinking heat-shrink tubing, and softening adhesives. They typically consist of an electric or gas-powered unit with a nozzle that emits a controlled and concentrated flow of hot air. Heat guns are versatile and widely used in DIY projects, construction, electronics, and other industrial tasks where precise and controlled heating is required. They are equipped with adjustable temperature settings and airflow controls, allowing users to tailor the heat output to specific needs.
