Research Summary

Heli-Coil thread inserts are helically coiled wire inserts used to repair or reinforce threads in various materials, such as metals and plastics. These inserts are designed to provide stronger and more durable threads in applications where the original threads have become damaged, stripped, or worn out. The helical coil design allows for easy installation by screwing the insert into a pre-tapped hole or using special tools to create new threads. Heli-Coil inserts come in various sizes and materials, including stainless steel and phosphor bronze, to suit different applications and environmental conditions. They are widely used in industries such as automotive, aerospace, and manufacturing to restore the integrity of threaded connections and prevent the need for more extensive repairs or component replacement. Heli-Coil thread inserts are known for their reliability, versatility, and ability to extend the life of threaded connections in a cost-effective manner.

The major global manufacturers of Heli-Coil Thread Inserts include Wilhelm B?llhoff GmbH and Co. KG, STANLEY, Amecoil, KATO Fastening Systems, Recoil, Tool
