### Research Summary

Helicopter-based transportation refers to the use of helicopters for moving people, goods, or equipment from one location to another, typically in areas where traditional road or air transportation is impractical or unavailable. This mode of transportation is commonly used in industries such as oil and gas, mining, emergency medical services (EMS), search and rescue operations, tourism, and military operations, where rapid access to remote or hard-to-reach areas is essential. Helicopters can provide point-to-point travel, bypassing traffic, navigating difficult terrain, and accessing locations like offshore platforms, mountain tops, or disaster zones. They offer flexibility, speed, and the ability to land in confined or isolated areas, making them an invaluable tool for both commercial and emergency use. Helicopter-based transportation is often preferred in situations that require quick response times, such as medical evacuations or urgent cargo delivery, as well as for scenic or luxury travel experiences.

The major global suppliers of Helicopter-based Transportation include Bristow Group, ERA Group, CHC Helicopter, Leonardo Company, Erickson Incorporated, PHI, Inc., Heli-
