Research Summary

Hermetic sliding doors are specialized, airtight entrance systems designed for environments where maintaining strict control over air quality, pressure differentials, and hygiene is essential. These doors are commonly used in healthcare facilities, laboratories, cleanrooms, and other controlled environments. The term 'hermetic' in this context signifies a complete seal, ensuring that the doors are airtight when closed. This sealing capability helps prevent the infiltration of contaminants, pathogens, and air from outside the controlled space. Hermetic sliding doors are often equipped with sophisticated sealing mechanisms, such as gaskets and interlocking systems, to achieve a high level of air-tightness.
