### Research Summary

High Security Registration Plates (HSRP) are standardized vehicle license plates designed to enhance security and reduce vehicle theft and cloning. Mandated by many governments worldwide, these plates feature several advanced security features, including a unique laser-etched code, a hologram, and non-removable, non-reusable snap-on locks, making them difficult to tamper with or duplicate. HSRPs are typically made from high-quality aluminum and include reflective sheeting for better visibility. The standardized design helps law enforcement agencies quickly identify and verify vehicle registration details, improving overall road safety and vehicle tracking.
