Research Summary

High Selenium Yeast refers to a specialized form of yeast that has been enriched with elevated levels of selenium, an essential trace element with antioxidant properties. Selenium is crucial for various biological functions in humans and animals. High Selenium Yeast is produced by culturing yeast in a selenium-rich environment or by supplementing the growth medium with selenium compounds. This process results in yeast cells that accumulate higher concentrations of selenium compared to regular yeast. Selenium is an essential component of selenoproteins, which play a vital role in antioxidant defense mechanisms and various physiological processes. High Selenium Yeast is commonly used as a dietary supplement to address selenium deficiencies and promote overall health. The increased selenium content in this yeast makes it a valuable nutritional source for individuals seeking to incorporate selenium into their diets, especially in regions with selenium-deficient soils.

The major global manufacturers of High Selenium Yeast include Alltech, Lesaffre, Angel, Lallemand, Novus International, Cypress Systems, Biorigin, Diamond V,
