### Research Summary

A hybrid adhesive and sealant is a versatile bonding product that combines the characteristics of both adhesives and sealants. It is formulated to provide strong adhesive properties for bonding various materials together while also offering effective sealing capabilities to prevent the passage of fluids, air, or contaminants. Hybrid adhesives and sealants typically exhibit high initial tack, rapid curing, and excellent adhesion to a wide range of substrates, including metals, plastics, and composites. These products are commonly used in construction, automotive, and industrial applications where a reliable and durable bond is required, along with the added benefit of sealing to protect against environmental factors. The hybrid nature of these products often means they are free of solvents and isocyanates, making them user-friendly and suitable for diverse bonding and sealing needs.

The major global manufacturers of Hybrid Adhesive & Sealant include Henkel, Sika, 3M, ITW, Wacker, Arkema, H.B. Fuller, Soudal, Tremco Illbruck, Hermann Otto, Permabond, Dymax, etc. The global players competition landscape in this report is divided into three
