Research Summary

Ibuprofen API (Active Pharmaceutical Ingredient) refers to the pure, active substance of the drug ibuprofen, which is a nonsteroidal anti-inflammatory drug (NSAID). As an API, ibuprofen is the pharmacologically active component responsible for the therapeutic effects of the medication. It works by inhibiting the enzymes involved in the production of prostaglandins, thereby reducing pain, inflammation, and fever. Ibuprofen API serves as the foundation for the formulation of various pharmaceutical products, including tablets, capsules, and liquid suspensions, that are then made available for over-the-counter or prescription use. Pharmaceutical manufacturers use high-quality ibuprofen API to ensure the safety and efficacy of the final drug products. The production, quality control, and regulatory aspects of ibuprofen API are closely monitored to meet pharmaceutical standards and ensure the consistency and reliability of ibuprofen-containing medications used for pain relief and anti-inflammatory purposes.

The major global manufacturers of Ibuprofen API include IOLCP, SOLARA, Shandong Xinhua Pharmaceutical, Biocause, BASF, SI Group, etc. The global players competition landscape in this report is divided into three tiers. The first tier comprises global leading
