Research Summary

Icynene spray foam insulation is a high-performance insulating material made from a water-blown polyurethane foam that expands upon application to create an airtight and energy-efficient seal. Known for its excellent thermal insulation and soundproofing properties, Icynene is widely used in residential, commercial, and industrial buildings to improve energy efficiency and indoor comfort. This insulation is applied as a liquid that quickly expands to fill gaps, cracks, and hard-to-reach spaces, eliminating air leaks and providing a seamless barrier against moisture and allergens. Its open-cell or closed-cell formulations offer flexibility for different applications, such as wall cavities, attics, and crawl spaces. By reducing energy consumption and enhancing indoor air quality, Icynene spray foam insulation is an effective solution for modern sustainable construction.
