Research Summary

An indoor cycling bike, often referred to as a stationary exercise bike or spin bike, is a fitness equipment designed to replicate the experience of outdoor cycling within an indoor setting. These stationary bikes feature a sturdy frame, a comfortable saddle, and handlebars similar to those on a traditional bicycle. What distinguishes them is the ability to adjust resistance levels, allowing users to simulate various terrains and intensities during their workout. Indoor cycling bikes are popular in fitness centers and home gyms, offering users a low-impact cardiovascular exercise option that helps improve cardiovascular fitness, leg strength, and endurance.
