### Research Summary

Industrial casters are specialized wheels mounted on a swivel frame or rig, designed for heavy-duty applications in industrial settings. These components are crucial for enabling the mobility of industrial equipment, carts, and machinery, allowing them to be easily moved or repositioned within a facility. Industrial casters come in various configurations, including swivel, rigid, and locking casters, each tailored to specific mobility requirements. They are constructed with durable materials such as steel or cast iron to withstand the substantial loads and harsh conditions prevalent in industrial environments. These casters are widely used in manufacturing facilities, warehouses, and distribution centers, providing efficient and maneuverable solutions for transporting heavy loads and equipment across the shop floor. The choice of industrial casters depends on factors like load capacity, floor conditions, and the specific demands of the industrial application.
