Research Summary

Industrial hook and loop, also known as Velcro, is a fastening system widely used in industrial applications for secure and adjustable closures. Comprising two components – hooks and loops – this system creates a strong yet temporary bond when pressed together, allowing for easy and repeated fastening and unfastening. The hook side consists of small, rigid hooks, while the loop side consists of softer loops. This versatile fastening solution is designed for heavy-duty use, providing reliable closures in diverse industrial settings.
