Research Summary

Inositol is a naturally occurring carbohydrate compound that belongs to the vitamin B complex group, although it is not an essential nutrient for humans as it can be synthesized in the body. It is found in various foods such as fruits, beans, grains, and nuts, as well as in the human body, particularly in the brain and other tissues. Inositol plays a crucial role in numerous physiological processes, including cell signaling, neurotransmitter function, lipid metabolism, and insulin signaling. It is involved in the regulation of mood, neurotransmitter transmission, and insulin sensitivity, making it important for mental health, cognition, and metabolic health. Inositol supplements are sometimes used as a complementary therapy for conditions such as anxiety, depression, polycystic ovary syndrome (PCOS), and insulin resistance, although further research is needed to confirm its efficacy for these purposes.

The major global manufacturers of Inositol include TSUNO, Zhucheng Haotian Pharm, Falcon Wealth(Jilin), Suning Yuwei, Bohaoda, Jingkai Biotechnology, Zouping Chenshi Bio-engineering, etc. The global players competition landscape in this report is divided into three tiers.
