Research Summary

Insulated metal panels (IMPs) are prefabricated building panels consisting of two metal skins, typically made of steel or aluminum, bonded to a rigid insulating core, such as polyurethane or mineral wool. These panels offer a highly efficient solution for building envelope construction, providing both structural support and thermal insulation in a single integrated system. The metal skins serve as weather-resistant and durable exterior surfaces, while the insulating core helps to minimize heat transfer, reduce energy consumption, and maintain indoor comfort levels. Insulated metal panels are commonly used in commercial, industrial, and residential construction for applications such as exterior walls, roofs, and ceilings, offering fast installation, design versatility, and long-term performance benefits. They contribute to energy efficiency, sustainability, and overall building performance, making them a popular choice for modern construction projects.

The major global manufacturers of Insulated Metal Panels include Metl-Span, Kingspan Panel, Centria, MBCI, Metal Sales, Nucor, Huntsman, ATAS, Green Span, IsoCindu,
