Research Summary

An intraoral sensor is a small, digital imaging device used in dentistry for capturing X-ray images of the teeth and surrounding structures. This sensor is designed to be inserted into the patient's mouth, allowing for efficient and detailed radiographic examinations. Unlike traditional film-based X-rays, intraoral sensors use digital technology to instantly capture and display the images on a computer screen. This digital approach reduces the exposure to radiation, provides immediate results, and allows for easy storage and sharing of the images in a patient's electronic health record. Intraoral sensors play a crucial role in diagnostic dentistry, aiding dentists in identifying and assessing various dental conditions with precision and speed.

The major global manufacturers of Intra Oral Sensor include Dentsply Sirona, Envista, Vatech, Planmeca, Carestream, Midmark, Acteon, Owandy, MyRay, ImageWorks, DentiMax, Handy, etc. The global players competition landscape in this report is divided into three tiers.
