Research Summary

IQF (Individually Quick Frozen) products refer to food items that have undergone a freezing process where each piece is frozen individually. Unlike traditional freezing methods that may result in the formation of ice crystals and clumping, IQF products are frozen rapidly, preventing the formation of large ice crystals and maintaining the individual integrity of each piece. This method is commonly used for fruits, vegetables, seafood, and other perishable food items. IQF technology allows for better preservation of texture, flavor, and nutritional quality, as each piece is frozen separately. The individual quick freezing process also offers the advantage of portion control, allowing consumers to easily access and use the desired quantity without thawing the entire product. IQF products have become popular in the food industry and among consumers for their convenience, freshness, and the ability to retain the natural characteristics of the food.

The major global manufacturers of IQF Products include Superior Foods Companies, SunOpta, Simplot, Titan Frozen Fruit, Gaotai, Jinyuan Agriculture, Junao, SCELTA,
