### Research Summary

An irrigation traveling gun system is a mobile irrigation system used to water large agricultural fields. It consists of a self-propelled cart equipped with a high-pressure water pump, a hose reel, and a sprinkler gun. The system is typically connected to a water source, such as a well or a water reservoir, and moves along the length of the field on a track or rail system. The sprinkler gun is mounted on the hose reel and can rotate in a full circle, spraying water over a wide area as the cart moves forward. The traveling gun system is controlled by a timer or a computerized controller, allowing farmers to adjust the watering schedule, duration, and coverage area according to the specific needs of the crops. This system is especially useful for irrigating large fields with irregular shapes or varying terrain, providing efficient and uniform water distribution while minimizing labor and water usage.

The major global manufacturers of Irrigation Traveling Gun System include Lindsay Corporation, Bauer, Ocmis Irrigazione, Huayuan Water-Saving, RM Irrigation Equipment, Casella Macchine Agricole S.r.l., Irrimec srl, Kifco, IDROFOGLIA, Giunti
