Research Summary

An Isolated Compressed Oxygen Self-Rescuer (SCSR) is a portable breathing device designed to provide emergency oxygen to individuals in hazardous environments where there may be a lack of breathable air. Encased within a sealed canister, the SCSR contains compressed oxygen that remains isolated from the surrounding atmosphere until activated. In the event of an emergency, the user initiates the device, releasing the oxygen supply for inhalation. This isolated design ensures the oxygen source remains unaffected by external contaminants such as smoke, toxic gases, or low oxygen levels, providing a reliable source of breathable air for escape and survival in hazardous situations.
