Research Summary

Jamon Iberico is a type of cured ham that is highly prized for its exceptional quality and flavor. It originates from the Iberian Peninsula in Spain, where it is produced primarily from a breed of pig called the Iberian pig, known locally as 'pata negra' due to its distinctive black hooves. Jamon Iberico is renowned for its marbling of fat, which gives it a rich and complex flavor profile. The pigs are typically raised in extensive outdoor conditions and fed a diet consisting mainly of acorns (bellota), which contributes to the unique taste and texture of the meat. After slaughter, the hams are salted and cured for an extended period, often ranging from 12 to 36 months or more, depending on the desired quality. The result is a delicacy with a deep, nutty flavor, a smooth and buttery texture, and a melt-in-your-mouth quality. Jamon Iberico is typically sliced thinly and served as a tapa, accompanied by bread, cheese, and wine, or used as a key ingredient in various dishes in Spanish cuisine. It is considered one of the finest and most luxurious hams in the world, coveted by food enthusiasts and connoisseurs alike.
